InSCHEDULER

NEC'S BUILT-IN AUDIO AND VIDEO REMOTE CONFERENCING SOLUTION

NEC In-App
BUILT-IN SOLUTION

SECURE, HASSLE-FREE CONFERENCE CALLS FOR UP TO 32 USERS

Enjoy full control of your audio and video conference calls with NEC's browser-based InScheduler Remote Conference.

This cost-effective, built-in solution enables frictionless, scheduled audio and video conference calls from a single graphical user interface. Each conference is password-protected, has a single dial-in 'pilot' number and provides participants the same conference experience inside or outside the office. Callers also get instant access without the hassle of waiting for downloads.
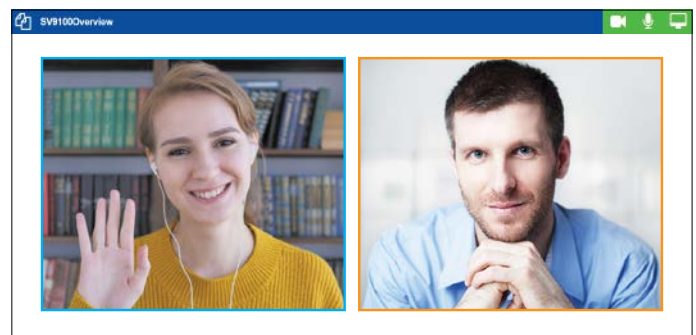

What's more, calls be easily recorded for when you need a record of who said what.

Audio conferencing – for up to 32 participants and for up to 20 simultaneous conference groups.

Video conferencing – for up to 8 participants and for up to 4 simultaneous conference groups – collaboration includes audio, video and screen-sharing.

INSCHEDULER BUSINESS BENEFITS

> **Scheduling made easy** – allows the scheduling of conference 'rooms' via an all new dashboard and integrates with Microsoft ® Outlook

> **Conference Recording** – Easy call recording can be configured per conference to start automatically or manually

> **No more interruptions** – Unlike other conference bridges, your conference call is scheduled and password protected for invited participants only

> **Save money** – No conference unit hardware to pay for; conference calls also eliminate travel costs and time and even accommodation costs

> **No download for participants** – When meeting with sales prospects or a client you can't always afford to wait for everyone to download; create a new calendar invite with a single click!

> **Online meetings on the go** – Whether you are in the office or on the go, InScheduler gives you the same full-featured conference experience

> **Easy dial in access** – Don't let complicated dial-in instructions ruin your conference calls – enjoy easy access to join a call
