

NEC ExpressCluster X for Windows R3 (v3.2.1.1) Release Notes

August, 2014

This is a minor update release for the ExpressCluster X R3 major release for Windows that is backwards compatible with previous ExpressCluster X R3 releases.

What's New Since v3.1.5.1

- **For WAN, LAN, and SAN Editions**
 - Windows Server 2012 R2 OS is now supported including the Hyper-V virtualization hypervisor role.
 - In-Place rolling upgrade from ExpressCluster R1/R2 releases to R3 of the same product edition is now supported.
 - Java Run Time v7 is now supported for ExpressCluster WebManager.
 - ExpressCluster SNMP integration is now fully supported on Windows Server 2012.
 - Recovery actions for Network Partitioning (split-brain) condition has been enhanced.
