

SMART ACCESS

Transform employee and visitor experience

SMART ACCESS provides an easy-to-use, automated, private and touch-free self-service that guides employees, visitor or others through the check in/check out process normally provided at a reception desk. A person's identity is verified, reservation information is retrieved and an entry badge and information supporting a person's stay are automatically issued.

The service not only transforms the visitor experience and enhances staff and employee efficiency, it also reduces waiting times and boosts safety and security.

AT A GLANCE

- › Transforms the experience for all those that enter a business
- › Touchless or touch modes that are intuitive and easy-to-use
- › Visitors/employees/others will be sent an email from the Smart Access application inviting them to preregister and sign off on customizable policies and agreements
- › Preregistration includes QR Code or Face Recognition/ Matching resulting in a touchless check in experience
- › Preregistration speeds up check in/out process
- › Integrated thermal scanning option scans for elevated body temperature prior to check-in
- › Dashboard access to view all current and remaining check in capacity limits per specified location or all defined office locations
- › Print visitor badges with customized company logo

- › Email/SMS notifications for completed registrations, check ins, check outs, abnormal temperature scans, and defined capacity limits reached
- › Creates detailed reports that include check in/out times, and signed agreements when applicable
- › Available from Google Play® for Android tablets and from the NEC Application store

SMART ACCESS

In today's security and health conscious environment, businesses want to provide a safe and comfortable experience for employees returning to work, visitors, guests, contractors, delivery personnel, customers, patients, members of a gym, students... This includes defining the number of individuals allowed into the facility, capturing individuals' temperatures, and presenting company compliance agreements. Employers also want to track and monitor access to their facility and even keep a record of their time spent on the premises. The majority of this is now done manually and compiled from paper sign-in/out logs, time clock records and receptionist files. Visitors are usually provided with a generic "Visitor" badge to identify themselves while on premises. Wouldn't it be great if all of this was automated and touchless? With SMART ACCESS - you can!

Additionally, many businesses are screening the temperature of employees and visitors to help detect and identify those that have fevers and may be sick - another high contact labor-intensive task. With SMART ACCESS, this can now be automated, private and touchfree. QR Code and/or Face Matching with thermal integration allow for an automated, touchless employee and visitor check in/out workflow process which then archives information for easy retrieval.

TRANSFORM VISITOR AND EMPLOYEE EXPERIENCE

SMART ACCESS transforms employee and visitor experience. With this application on an Android tablet and/or thermal Android tablet positioned at your entry/exit point(s), an employee or visitor simply walks up to the tablet and the application guides them through the process.

Those employees or visitors who have preregistered for Face matching or have been assigned a QR code, simply position their face or QR code to be scanned by the Tablet's camera. The application also allows walk-in visitors to check-in. Upon check in, an Email and/or SMS notification can be sent to the person that they have come to meet with.

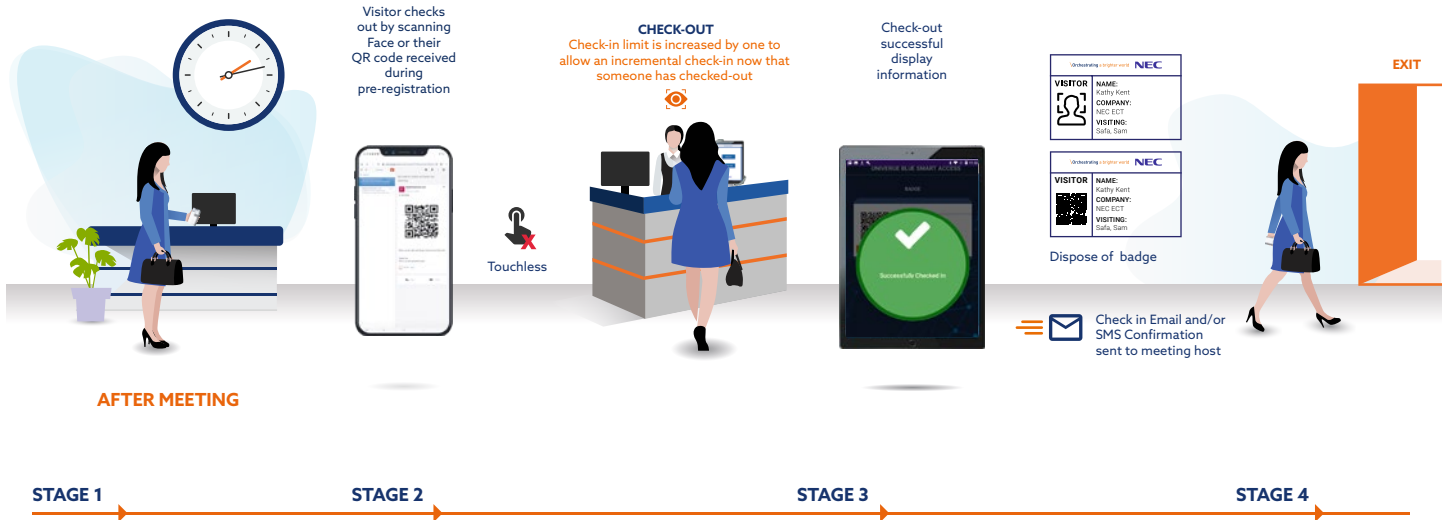

This complete solution includes the SMART ACCESS application software that you can customize with your logo, integrated QR code or Face Match handling that streamlines the process, enhances security, and provides a touchless experience, and a badge printer.

When the visitor engages the application, here are some of the steps and easy to use screens they will go through to check-in:

TOUCHLESS CHECK-IN WITH PRE-REGISTRATION (SCAN QR-CODE OR FACE)

VISITOR CHECK-OUT (TOUCHLESS)

When visitors have finished with their meetings and head out of the office, they simply stop by the SMART ACCESS tablet on their way out, hand in their badge if applicable, pull up their profile by using their QR code, and it will automatically check them out.

As with check in, once a visitor has checked out, a notification can be sent to the person they were visiting. The application also automatically records check-in and out times. You also have the option to automatically check-out all visitors who fail to check-out by the configurable Auto Check-out time set by the Smart Access Administrator.

EMPLOYEE PRE-REGISTRATION & CHECK-IN FLOW

Employee(s)

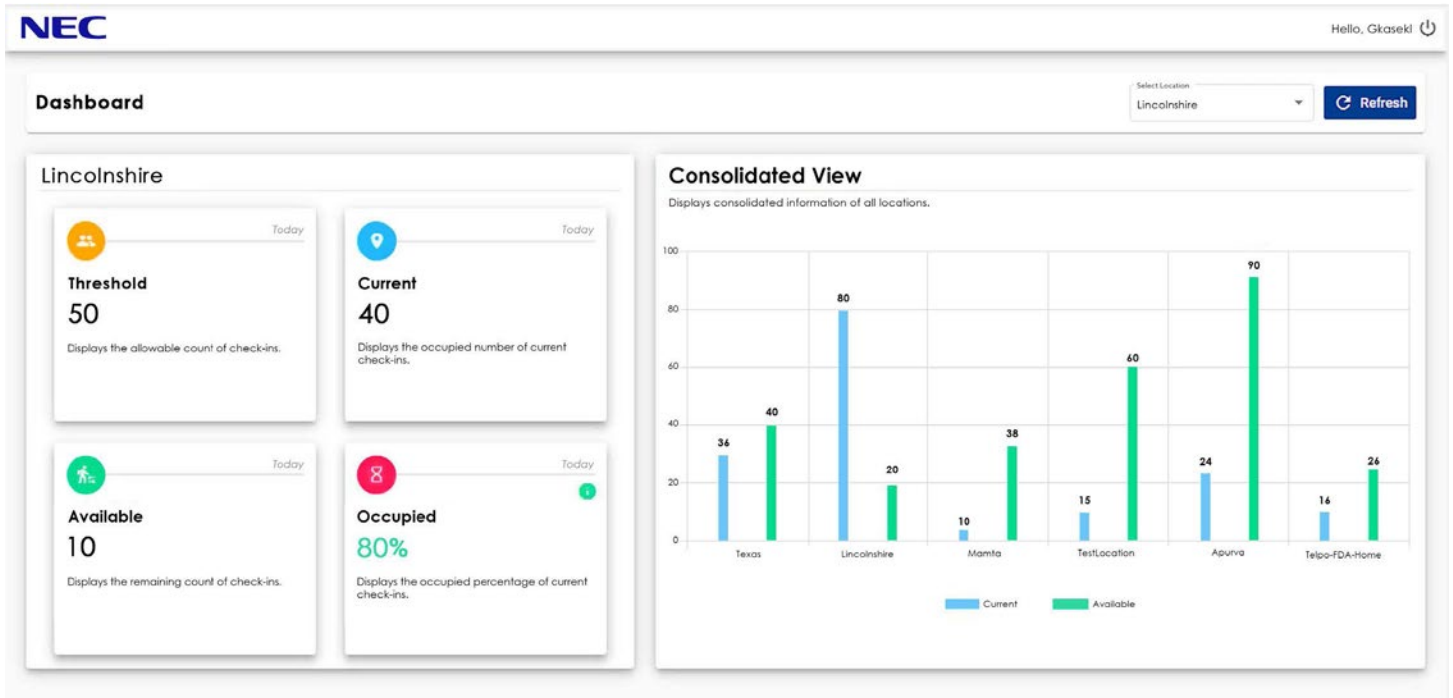

VISITOR AND EMPLOYEE LOGS AND REPORTS

SMART ACCESS records all visitors and employees entries and lets you easily download a detailed report in Excel.

You are able to keep a history of all visitors and employees. Also, a real-time dashboard provides a quick look at capacity limit tracking across all locations.
