

Orchestrating a brighter world

NEC

NEC MEETING CENTER

SMART APPLICATION SUITE
FOR ALL SMALL, MEDIUM &
LARGE ENTERPRISES

REAL-TIME SHARING & EXCHANGE OF INFORMATION

With technology changing exponentially and workforces becoming more mobile, having the right collaboration and conferencing tools can make a huge difference in your team's ability to maintain high levels of customer service – no matter their location.

A SMART APPROACH

EFFICIENCY AND GREATER PRODUCTIVITY

NEC Meeting Center (NMC) provides a 'suite of applications' which includes, sophisticated audio conferencing, web collaboration, and predefined dial-out conferencing for all of NEC's communications platforms. This comprehensive suite equips your employees with the tools they need to help them improve efficiency, lower spending by reducing the need for travel and stay informed. As a result, your employees become more responsive and productive through real-time sharing of information and most importantly, service your customers better.

- > **Improves teamwork** among colleagues in geographically dispersed locations
- > **Enables real-time sharing** and exchange of information between co-workers and customers
- > **Reduces travel costs** through enhanced collaboration tools
- > **Increases employee efficiency** and productivity
- > **Eliminates monthly recurring charges** for hosted solutions
- > **Supported on** NEC's UNIVERGE® 3C™, UNIVERGE® SV9100, and UNIVERGE® SV9500 communications platforms
- > **Improves security of your data** as it is deployed behind the safety of your firewall
- > Operates across **premises, private cloud or hybrid environments**

COMPREHENSIVE, SECURE COLLABORATION SOLUTION

IMPROVING THE EMPLOYEE AND CUSTOMER EXPERIENCE

NEC Meeting Center (NMC) is a secure, premises-based solution that encourages collaboration and helps lower expenses.

By implementing a premises-based solution, you immediately eliminate your recurring expenditures for a hosted solution. Besides saving you money, NMC provides you with the peace of mind that your communications with your employees and customers occurs on your own secure network.

NEC Meeting Center:

- > **Provides Meet-Me (both on-demand and scheduled) audio conferencing, Dial-Out Firebar conferencing, and web and video collaboration**, all in one comprehensive solution
- > **Alleviates the need and expense of deploying multiple unique applications** from multiple vendors
- > **Supports webinars** with screen sharing and white boarding
- > **Browser-based** and mobile friendly
- > **Offers secure connections** with individuals in geographically diverse locations for employees to conduct presentations, meetings and training
- > **Enables collaboration** with colleagues and customers for real-time sharing of information

SECURE COMMUNICATIONS

SINGLE APPLICATION OFFERS SECURE CONNECTIONS FOR MOST ANY SITUATION OR NEED THAT ARISES

**MEETING
CENTER**

NEC

STAYING CONNECTED HAS NEVER BEEN EASIER

With NEC Meeting Center's rich set of audio conferencing capabilities, staying connected from any location has never been easier. It allows your employees to set up and manage secure conference calls via their PC or through the web portal on their mobile device.

ELEVATE THE EMPLOYEE EXPERIENCE

YOUR EMPLOYEES ARE YOUR MOST VALUABLE ASSET

By providing your employees with tools that simplify setting up and hosting conference calls with customers and colleagues, it helps to make them more efficient and productive along with enhancing their work environment.

- > Supports both **reservation-less and reservation-based** audio conferences
- > **Enable secure conference access** (requires conference access code and a personal PIN)

AUDIO CONFERENCING DONE RIGHT

FLEXIBLE, CUSTOMIZABLE AND SECURE COMMUNICATIONS

- > **Customize each audio conference room per your requirements**, e.g., select entry tones, select memorable vanity PINs, turn recording on/off, select auto-call back on/off, select enter audio conference muted on/off etc...
- > **Schedule recurring audio conferences via the Web Portal** - use Microsoft® Office Outlook® iCalendar application to send invitations to desired participants
- > **See real-time view of a running audio conference** via NMC's "Real View" Web Portal - participants can be seen by name or by caller ID, recording can be managed, participants can be muted or dropped from conference and more...
- > **Display loudest speaker** - allows the identification and muting of a participant who may be inadvertently injecting noise into the audio conference
- > **Exercise multiple in-conference controls** via phone key presses or the Web portal
- > **Auto mute** noisy lines or lines with excessive echo
- > **Merge two or more audio conferences** into one without dropping any calls - transfer participants between conferences
- > **Send a detailed end-of-conference summary report** to the moderator after a given audio conference is over
- > **Record entire conference** or excerpts from a conference and playback via PC's media player or via dial-in IVR or send via the summary email mentioned above

REACH SELECT GROUPS OF PEOPLE QUICKLY

Whether you need to reach a group of first responders quickly during an emergency or have a weekly scheduled call with a group of your colleagues, NEC Meeting Center's Dial-Out (Firebar) conferencing can meet your requirements.

CONNECTS PEOPLE SEAMLESSLY SIMPLY ANSWER THE PHONE

NMC Dial-Out (Firebar) Conferencing allows the server to call a pre-determined group of people and upon off-hook place them into an audio conference. Once a conference is in progress, various DTMF controls available on NMC Audio Conference can be exercised. NMC Dial-out conferencing provides flexibility to reach a group of people via voice, email, and SMS text and if necessary pull them into an impromptu audio conference.

- > Trigger a dial-out conference based on either an incoming phone call, a click on a web portal or a scheduled time
- > Select communications medium to be used for message delivery [Voice only, Email only, SMS (via SMTP) only or any combination etc.]
- > Send calls to any PBX extensions or to PSTN landline or cellular numbers
- > Supports an unlimited number of call out groups
- > Send caller-ID of your choice that can be used by recipient's cell phone to display associated 'caller name' (e.g., Central Security)
- > Allow recurring dial-out calls
- > Offers answering machine detection and avoidance
- > Provides summary and detailed reports on call completions (Busy, No Answer, Answering machine etc.)

RECURRING 'FIND ME' CONFERENCE CALL AUTOMATICALLY 'DIALS-OUT' TO CONFERENCE GROUP

For regularly recurring meetings with a specific group or team, Dial-Out (Firebar) Conferencing makes it easy for everyone to connect and join the call. No need to search for the dial-in and/or PIN number, NMC automatically dials and connects everyone at the pre-determined time.

- > **NMC triggers a dial-out to designated group of people** and upon off-hook, places them into a conference
- > **'Find Me' capabilities will call all available numbers** for an individual until they answer – no need to sit by a particular phone to join
- > Alleviates the need to **continually schedule the meeting**

INSTANTANEOUS 'FIND ME' CONFERENCE CALL GREAT FOR CONFERENCING FIRST RESPONDERS

In the event of an emergency, quick communications between first responders is critical. NMC's Dial-Out (Firebar) Conferencing enables you to trigger a conference call simply and easily. Through pre-configured NMC service selection rules, dial-out conferences can be initiated based upon incoming Caller ID or called number. It can also be triggered via the web portal.

- > **Initiate a conference call with a single press** of a pre-programmed speed-dial key
- > **'Find Me' capabilities** ensure that necessary personnel are reached and join the call
- > **Answering machine detection** and avoidance saves times in reaching people
- > **Recording options** are available for later playback

ELEVATE CUSTOMER AND EMPLOYEE EXPERIENCE

Ensuring that your employees have the right tools to collaborate with each other as well as customers, enhances their overall work environment. It makes it easier for them to communicate, and share ideas and information with colleagues and customers.

When you take communications a step further by adding video and whiteboarding capabilities along with other features, it adds a whole new visual element for both employee and customer – enhancing their overall experience.

SMART COLLABORATION

REAL-TIME SHARING OF INFORMATION

By combining NMC Web Collaboration with NMC Audio Conferencing or using WebRTC PC Audio, you can further enhance the collaboration capabilities of your employees. When used together, participants can collaborate in real-time and achieve desired end results quickly without exchanging multiple emails.

- > Can be used standalone or in conjunction with NMC's Audio Conferencing application
- > Web-based application - no software download required and no recurring costs that are usually associated with hosted solutions
- > Designed to run across the Internet or a private data network without requiring any changes to firewalls - running behind a secure private data network helps ensure that your web conference content cannot be compromised

- > Review projects, schematics, diagrams and presentations with customers and colleagues
- > Upload images to Whiteboard for annotation by attendees - save annotated image to local PC after meeting
- > Perform public chat to all participants or private chat – ability to upload documents or files to the Chat so other participants can download
- > Record entire meeting and download to MP4 file that can be easily distributed
- > NMC Web Collaboration is totally based on latest technologies, HTML5 and WebRTC

NEC MEETING CENTER SMALL VIDEO CONFERENCE

The screenshot displays the NEC Meeting Center Small Video Conference interface. The main area shows four video feeds of participants: Seth L., Jude B., Cliff, and Maria. To the right is a sidebar titled 'Attendees' listing participants and moderators with icons for video, audio, and chat. At the bottom is a toolbar with various icons for meeting controls. Callouts point to the following features:

- Conference Settings
- Mute
- Video Conference
- ScreenSharing
- Home
- Record
- File Manager/Poll, Help
- Whiteboard
- End or Leave Meeting
- View/Detach Participant Pane
- View/Detach Chat Pane

NEC MEETING CENTER LARGE VIDEO CONFERENCE

The screenshot displays the NEC Meeting Center interface for a large video conference. The main area shows a grid of 48 participant video feeds. To the right is a sidebar titled 'Attendees' listing 3 moderators and 17 participants, each with icons for video, audio, and actions. The bottom toolbar contains icons for various functions, which are labeled with callouts:

- Conference Settings**: Gear icon.
- Mute**: Microphone icon.
- Video Conference**: Video camera icon.
- ScreenSharing**: Screen with arrow icon.
- Home**: Home icon.
- Whiteboard**: Whiteboard icon.
- Record**: Record icon.
- File Manager/Poll, Help**: Document icon.
- End or Leave Meeting**: Exit icon.
- View/Detach Participant Pane**: Participant pane icon.
- View/Detach Chat Pane**: Chat icon.

The 'Attendees' list on the right includes the following participants:

- Moderators**:
 - SL Seth Leigh (Presenter)
 - JB Jude Braddock
 - CL Cliff
- Participants**:
 - MA Maria (You)
 - TT Troy Tyler
 - SR Stella Reed
 - AH Autumn Howard
 - JC Justin Collins
 - JC Joel Cruz
 - SW Serenity Woods
 - WW Wesley Walker
 - JW Johan Watts
 - SM Sandra Moore
 - VF Victor Fuller
 - JE Jeremy Edwards
 - VP Vincent Peterson

FEATURE	HOW IT WORKS	BENEFITS
Audio Conferencing		
Ad-hoc 'Meet Me' Audio Conference	Moderator and participants agree upon a start time and PIN to use. When people dial in and enter their PIN, they are placed into the conference.	Simple to use. PINs are always active and parties can join the bridge at any time.
Scheduled 'Meet Me' with PIN Audio Conference	Schedule conference call using web portal. Use iCAL to send email notifications via Microsoft Outlook, Lotus Notes, etc...	Ability to use your existing Outlook 'contacts'. Calendar will automatically remind participants about upcoming conference.
Dialed Number (DNIS)-Based Audio Conference	Multiple participants simply dial a phone number to join an audio conference.	No PINs to remember and simple to use. Utilizes NMC Service Selection rules that can be easily defined.
Progressive Dial Out Audio Conference	Moderator can dial out from the conference bridge and bring participants into a conference one by one.	Allows for impromptu conferencing - no need to inform participants ahead of time.
Conference Record and Playback	Set up your conference room with recording turned on. All calls will then be recorded in that room. You can also turn recording on/off via DTMF or Web controls.	Record entire conference or relevant excerpts. Use your PC's media player for playback or dial into the bridge and playback via IVR.
Monitor Audio Conference	Create a Moderator with 'monitor' privilege. This Moderator can then listen/control an ongoing conference unobtrusively.	Useful for diagnosing audio issues with a conference. Requires Incident Management add-in option.
Dial-Out Firebar Conferencing		
Instantaneous Dial Out with "Find-Me" Conference	Use an incoming phone call to trigger a dial out conference. Bridge will call participants at their multiple locations and connect them into a conference. Incoming number can be speed dialed.	Communicate with a 'group' with a single key press. Utilizes NMC Service Selection rules to automatically trigger the dial-out conference based upon incoming Caller ID or based on called number.
Recurring Scheduled Dial Out with "Find-Me" Conference	At a scheduled time, bridge will trigger a dial out to a group of people and upon off-hook, place them into a conference.	Reduces effort required to set up recurring conferences.

* The use of monitoring, recording or listening devices to eavesdrop, monitor, retrieve or record phone conversations or other sound activities, whether or not contemporaneous with transmission, may be illegal in certain circumstances under federal or state laws. Legal advice should be sought prior to implementing any practice that monitors or records any phone conversation. Some federal and state laws require some form of notification to all parties to a phone conversation, such as using a beep tone or other notification methods or requiring the consent of all parties to the phone conversation, prior to monitoring or recording the phone conversation. Some of these laws incorporate strict penalties.

FEATURE	HOW IT WORKS	BENEFITS
Web Collaboration		
Desktop Sharing	Moderator shares his/her Desktop with fellow participants.	Show any document or co-browse the Web with fellow participants. Simple to use and ideal for product demos.
White-Boarding	Create diagrams/visuals with fellow participants in a collaborative session or upload images that can be annotated by all.	Ideal for brainstorming or reviewing specific images and highlighting points of interest. Once an image has been annotated or just a plain whiteboard has been created, it can be downloaded as an image to your local PC.
Public & Private Chat Room	Moderator can respond to questions publicly or privately.	Makes Web conferencing more productive.
Record the Meeting	Entire meeting including screen sharing, video and audio can be recorded.	Users can download MP4 file with recording to sharing with others who were not able to attend.
Multiple Presenters	Moderator can allow another participant to take control and share his/her desktop.	Multiple points of view on one conference.

FEATURE	U3C	SV9500	SV9100
General			
Voice interface from system to NMC	SIP TRK	SIP STA.	SIP STA.
