ALL JUST FOR

\$7.99

PER USER

SUMMER
OFFER

WHAT'S INCLUDED IN THE SPECIAL OFFER

- DID for each MS Teams user - ported for new
- Unlimited local and domestic US long distance calling
- Dynamic E911 calling for Kari's Law / RAY BAUMS Act compliance
- Microsoft certified cloud-managed E-SBC for direct routing
- Media optimization
- Dual forking as an option

Microsoft Teams Direct Routing with NEC NETWORK CONNECT is the only solution that provides end-to-end visibility and control across your entire MS Teams telephony platform, down to the individual call.

It also includes all the telephony features of Operator Connect and leverages M2M and AI algorithm-based call routing to automatically direct calls to the best quality-of-service using the most direct path available.

NEC's NETWORK CONNECT for MS Teams integration is highly scalable and can be deployed in geographically distributed architecture, with management through a single pane of glass.

NEC and Microsoft have decades-long strategic partnerships, which have not only strengthened NETWORK CONNECT integration with Microsoft Teams but also helped in making it available as a service on Microsoft's Azure marketplace.

In using the NETWORK CONNECT platform, our customers also have access to additional value-added services such as Global Orchestration and Toll-Free Dynamic Protection that protect and improve international, 1-800 and contact center continuity while augmenting MS Teams integration with PSTN.

The unmatched carrier diversity and global presence of NETWORK CONNECT makes it the most cost-competitive MS Teams Direct Routing solution with "All Inclusive" telephony services.

KEY BENEFITS

- A carrier-grade platform with multi-carrier diversity
- Scalable with a cloud-optimized elastic model
- Geo redundancy and geographic diversity with automatic failover
- Visibility and control of the entire organization's MS Teams connectivity
- Enhanced security with compliance for emergency calls
- One stop shop with a single point of contact for all support needs

And of course ... the low price per user of
