

Unified Identity Tools for Every Mission - Public Safety & Civil Operations

NEC SmartScan™ MobileID

SmartScan MobileID

MobileID unlocks the same benefits of FastID through a native iOS or Android app. Agencies can pair MobileID with biometric capture peripherals or specialized biometric tablets in the field to extend biometric identification in truly remote settings. The solution is device and peripheral agnostic, allowing agencies to determine the best equipment to meet their operational needs and budget. MobileID brings biometric identity directly to department issued mobile devices - no laptop required.

Use Cases

Subjects in the field with no valid ID

Large-scale emergencies requiring rapid identification

SWAT/Special Ops warrant sweeps

Fugitive and investigative operations

Why Choose SmartScan MobileID

Ultra Portable: Pair MobileID with a pocket sized FAP 30 or FAP 45 fingerprint reader

Intuitive and Repeatable: Guided capture steps and quality checks eliminate user error

Standards Compliant: Contact-based fingerprint, face, and iris support meet strict law enforcement ID requirements

Multiplatform: iOS and Android support

Interoperable: Works with both NEC and third-party biometric identification systems through open standards
